

Non-domestic Rateable Property Statistics

This document has been provided to WLEP Board as background information to help inform the upcoming discussion. It outlines some headline data and trends on the commercial property market in Worcestershire over the last 10 years and provides a District, Borough, and City breakdown on average and commercial floorspace.

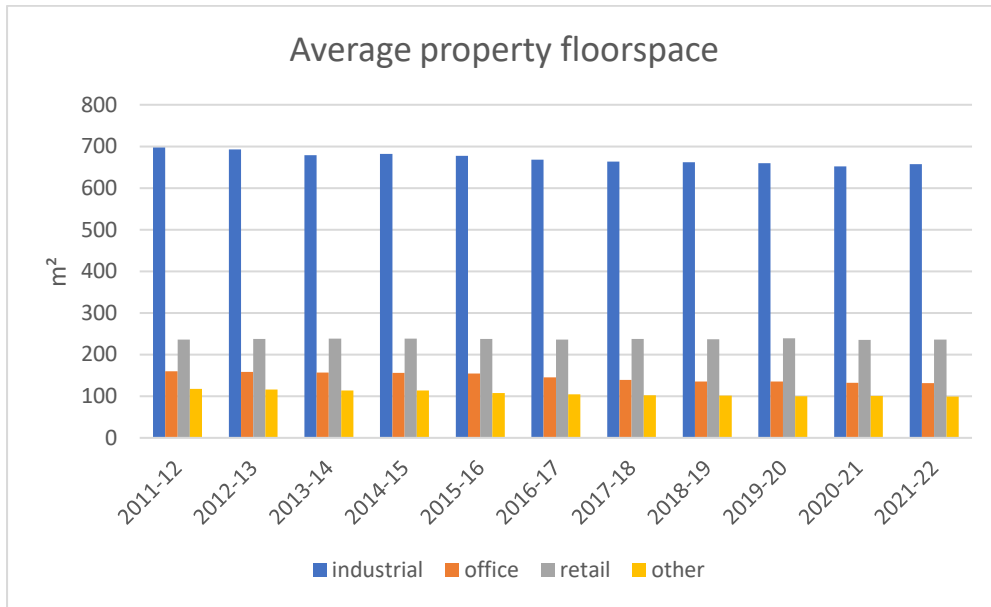

The number of non-domestic rateable properties has increased slightly in all sectors over the last 10 years.

Total floorspace has remained relatively stable over the last 10 years.

Meaning that the average floorspace has tended to fall slightly.

There are variations between districts as to the amount of floorspace in the different sectors.
